15. Review of Sharps, Flats, Naturals and Enharmonic Tones

"Sharps" raise tones by 1/2 step (A to A \sharp). "Flats" lower tones by 1/2 step (B to B b). "Naturals" are neither flat or sharp. "Enharmonic tones" are two tones (one a flat and one a sharp) which look different but are fingered and sound the same, as in A \sharp and B b (higher than A and lower than B).
